OBJECTIVE

Aspiring Java Backend Developer skilled in Java, Spring Boot, REST APIs, and MySQL. Looking to contribute to real-world backend development and learn scalable application development.

SKILLS

Backend: Java, Spring Boot, REST APIs, Hibernate
Frontend: HTML, CSS, JavaScript
Database: MySQL, SQL, MongoDB
Core: Data Structures & Algorithms, OOPs, OS
Tools: Git, GitHub

EXPERIENCE

Software Developer Intern — Datavalley.ai (Jan 2025 – Apr 2025, Vijayawada, AP)
- Developed REST-based backend services using Java & Spring Boot for a sentiment analysis web app.
- Implemented CRUD APIs and integrated MySQL for storing user inputs and results.
- Worked on modularizing application components to improve maintainability.
- Built responsive UI using HTML, CSS, and JavaScript.
- Collaborated with the team using Git and participated in code reviews.

PROJECTS

Sentiment Analyzer (Java + Spring Boot + MySQL)
- Built backend APIs using Spring Boot to process sentiment inputs.
- Integrated a Python sentiment model via REST communication.
- Stored user results in MySQL and displayed results on a web UI.

Spring OpenAI Chatbot (Java + Spring Boot)
- Implemented REST endpoints using Spring Boot for chatbot queries.
- Used MySQL to store chat history and user sessions.
- Built simple UI with HTML, CSS, and JavaScript.

Credit Card Fraud Detection (Python – ML)
- Implemented ML models to classify fraudulent transactions.
- Processed datasets and evaluated model performance.

ACHIEVEMENTS

- Solved 300+ DSA problems on LeetCode.
- Mentored juniors in programming and problem-solving.
